Backup Google Chat Style Update

2021.10.30.0s

- **CSS Revamp**
  - Improved ugly UIs
    - Added custom prompt UI
    - Native edit message UI added, instead of using prompt
    - Attach image UI overhauled
  - Made the site look better in general
  - 'Save messages I send' replaced with icon and moved to the footer
- **Dynamic Message Editing/Deletion**
  - Messages now update when a message around them was deleted/edited
  - Messages now display properly in DMs
- **Settings Menu**
  - Settings menu added
  - Settings moved from top bar to settings menu
  - More settings added
- **Security**
  - Firewall added, all requests now require authorization
  - Character limits are now enforced by the server as well as the client
  - Improvements to the automod system
  - Webhooks now use regular automod system instead of their own one
- **Themes**
  - Themes added
  - Dark mode theme added
- **Miscellaneous**
  - You can now hide the sidebar by clicking on the backup google chat logo
  - Added an update log
- **Bugs Fixed**
  - Messages sent by webhooks do not appear unless you reload the page
  - If you are talking as a webhook, reload the page, and send a message, it will send it as the webhook even though it is set to send it as you
  - If you attach an image, clear it, then send a message, sometimes that message will be sent with that image attached to it.
